DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks (page 5), filed 9/18/2006, with respect to claims 1-47 and 52-56 have been fully considered and are persuasive. The rejection of claims 1-47 and 52-56 has been withdrawn due to the cancellation of these claims.

Allowable Subject Matter

2. Claims 48-51 are allowed.

3. The following is an examiner's statement of reasons for allowance:

* All rejected claims have been cancelled to place the application in allowance condition;

* The present invention provides a new method of preserving data using high resolvability to allow encoding data in gray levels where the number of gray levels can be reproduced and detected exceeds the number of distinct gray levels that can be distinguished by the human eyes (specification, page 7, lines 3-7), and to allow a provider of document preservation services to offer its customers variable levels of information decoding so that only needed portions of encoded data are restored in response to a customer request (specification, page 7, lines 27-30).

Particularly, the new method comprises the following features, which the prior art taken either singly or in combination does not teach:

- assigning a data word having a first bit depth, said data word comprising a first data field and a second data field; scanning said grayscale pixel to obtain a

monochrome density value having a second bit depth (see independent claims 48 and 50).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
